Litter less incursion

On Wednesday the 16th of October the year 4/5 Pike class at St Joseph school had a litter less incursion with a nice lady named Wendy from KESAB.

She talked them through the Australian currents and how they create rubbish islands. She also taught them how to do a litter less order(rubbish pick up) around the school. The children started by getting in to groups and picking roles. The roles included, the litter picker, the line keeper, the mud mapper, the recorder and the emu bobber. The children got their props and went off in their groups and collected rubbish around the school. They had fifteen minutes to complete their task. Once the children had completed their task their teacher Mrs Pike called all the students back in to the classroom. Wendy(from KESAB) put a water proof blue mat on the carpet and she started going through the rubbish that the children had collected and seeing what kind of plastic was found the most, the plastic that was found the most was chip packets.

The students had a great time and are really excited to share their litter less ideas with the school and so was Wendy.
