About KESAB

Litter less is a fun environmental project to help kids recycle and find out how much rubbish there is at your school from whole size chip packets to tiny pieces of plastic. In the incursion you would be able to help find the rubbish draw were the rubbish is pick up the rubbish with gloves and buckets and make sure you don't miss the rubbish. Find more about this with the link down below to their website

Article from St Joseph's Kingswood

KESAB came to our school on Wednesday so we could learn more about our waste it started off with showing us the wind currents the ones most of the plastic gets stuck into which makes a massive pile of plastic in the ocean. Then we got put into groups of 5 and headed outside. Our group chose the playground since most kids drop their plastic there i was the emu bobber John was the rubbish picker Sid was the recorder and Sophie was the drawer. In the end we filled a bucket full of plastic, mouldy fruit cotton and much more in the end we put it all together with the groups and all together there was heaps of plastic

If you refuse to reuse its earth you abuse

It ended with too much to count. It was fun and I learned a lot that day about the environment.
